

Trump Unveils White House Water Slide

U.S. · Oct 22, 2025 · BabylonBee.com

WASHINGTON, D.C. — President Donald Trump announced this week that as part of the White House renovation, he will be installing a giant water slide on the roof that will go all the way down to the Rose Garden.

"Our country has been without a national water slide for far too long," President Trump told reporters. "When foreign dignitaries visit, we have nowhere to let them slide down into a cool splash pool. I'll be funding this project completely from private donations, and it will be a great asset to the American people for many years to come."

Designs for the massive new feature show a yellow and red fiberglass slide starting on the roof of the White House and ending in the Rose Garden, where a large swimming pool will be built to accommodate the slide. The new pool will also feature diving boards, a swim-up bar, and a basketball goal for friendly games of one-on-one.

At publishing time, President Trump had announced that he would also be bulldozing the entire National Mall and replacing it with a new golf course, and would keep the Reflecting Pool as a water hazard.
